

BLUE AND GREEN
ENVIRONMENT

DiadSea

DiadSea project is a transnational cooperation initiative of **9 beneficiary partners and 28 associated partners from 4 European countries** (Portugal, France, Spain, and Ireland) that is aimed at improving the management and conservation of diadromous migratory fish at sea in the Atlantic Area. By taking care of these fish and protecting their habitats, DiadSea hopes to not only help the environment but also bring benefits to local communities, both economically and culturally.
